March 11  Professor Ned A. Porter, Department of Chemistry, Vanderbilt University
“From Rate Constants to Human Syndromes: An Accidental Tour of Cholesterol Biosynthesis”

March 18  Professor Matthew Tirrell, Founding Pritzker Director and Professor (Institute for Molecular Engineering, University of Chicago) and Deputy Laboratory Director of Science (Argonne National Laboratory)
“Polyelectrolytes in Multivalent Ionic Media: New Physics and New Materials”
***Please Note New Time and Location: 2:00 PM in Room 228 NSC***

March 25  Professor Michael L. Neidig, Department of Chemistry, University of Rochester
“Structure, Bonding and Mechanism in Iron-Catalyzed Cross-Coupling”

April 1  Professor Thomas G. Back, Department of Chemistry, University of Calgary
“Organoselenium Compounds as Biological Antioxidants”

April 8  Professor M.G. Finn, Chair, School of Chemistry & Biochemistry, Georgia Tech
“Things that Roll Around and Do Stuff: Biological and Chemical Nanoparticles with Function”

Wednesday, April 13, 2016 – 8th Annual Howard Tieckelmann Lecture Series
4:00 PM in Norton Hall, Room 112

Guest Lecturer: Professor Geraldine L. Richmond
Presidential Chair and Professor of Chemistry
Department of Chemistry & Biochemistry, University of Oregon
“Oil On Water: Calming The Seas But Not The Sciences”

April 22  Professor Darren J. Lipomi, Dept. of NanoEngineering, UC San Diego
“Molecularly Stretchable Electronics for Energy and Healthcare”

April 29  Professor Adam M. Hawkridge, Dept. of Pharmaceutics/Dept. of Pharmacotherapy & Outcomes Science, Virginia Commonwealth University
“Mass Spectrometry-based Proteomics: Interplay Between Technology Development and Biomedical Applications”

May 13  BEST DISSERTATION AWARD, Department of Chemistry, University at Buffalo
